

# Therapists in Somatosensory Rehabilitation of Pain in the World

The first communication about somatosensory rehabilitation of pain was done at the occasion of the 1<sup>st</sup> Congress of the swiss society for hand therapy (SSRM) in 1992. In 2001, this method was taught for the first time. On November 23<sup>rd</sup> 2010, 500 therapist and medical doctors have been trained to the somatosensory rehabilitation method. It is the occasion to create this new section to visualize where they come from.
